	PAGE
MS 326 The Effect of Plastic Deformation on the Martensite–Austenite Transformation in Two Fe–Ni–C Alloys. By T. N. Durlu and J. W. Christian	1
MS 327 The Columnar-Equiaxed Change in Superpure Aluminium Containing Transition-Metal Additions. By I. Leszczynski and N. J. Petch	5
MS 328 The Strength and Ductility of Precipitation-Hardened Fe–Si–Ti Alloys. By J. D. Watson and G. G. Brown	9
MS 329 A Comparison of the Observed and Predicted Deformation Textures in Cubic Metals. By I. L. Dillamore and H. Katoh	21
MS 330 The Metallography and Superconductivity of Niobium-Rich Nb–Al–Ge Alloys. By J. A. Cave and T. J. Davies	27
MS 331 The Effect of Cold Work on the Mossbauer Spectra of Iron–Carbon Alloys. By A. T. Z. Abou Elnasr and C. N. Reid	33
MS 332 The Thermal Stability of Eutectic Composites in a Temperature Gradient. By D. R. H. Jones	37
MS 333 The Transition between Thermally Activated and Athermal Flow in Polycrystalline Alpha-Zirconium. By B. Heritier, M. J. Luton, and J. J. Jonas	41
MS 334 The Structure of Nitrided and Annealed Iron–Titanium Alloys. By D. H. Kirkwood, O. E. Atasoy, and S. R. Keown	49
MS 335 The Effect of Frequency and Strain Range on Environmental Fatigue Cracking in 20%Cr/25%Ni/Nb Steel at 1025 K (750° C). By R. P. Skelton	56
MS 336 Volume-Diffusion Coefficients in the $\beta$ -Phase Region of the Copper–Indium System. By B. G. Mellor and G. A. Chadwick	63
MS 337 The Unidirectional Growth of Copper–Indium Eutectoid Alloy. By B. G. Mellor and G. A. Chadwick	65
MS 338 The Mechanisms of Recrystallization in Cubic Metals with Particular Reference to Their Orientation-Dependence. By I. L. Dillamore and H. Katoh	73
MS 339 The Stress-Relaxation Behaviour of a Polycrystalline Zirconium–Oxygen Alloy between 0.3 and 0.4 T <sub>M</sub> . By W. B. James and T. J. Davies	84
MS 340 Stress-Dependence of Activation Volume of Dislocation Glide by Dispersed Local Obstacles. By B. Wielke	91
MS 341 Effect of Vanadium on the 475° C Embrittlement of a Chromium Steel. By P. Koutaniemi, V. Heikkinen, and A. Saarinen	94
MS 342 The Creep Fracture of Inconel X-750 at 700° C. By P. K. Venkiteswaran and D. M. R. Taplin	97
MS 343 Some Activation Parameters in Steady-State Creep of Aluminium–Magnesium Alloys at High Temperatures. By Hiroshi Oikawa, Junji Kariya, and Seiichi Karashima	106
MS 344 A Solid–Liquid Diffusion Couple Study of Peritectic Reactions. By A. P. Titchener and J. A. Spittle	112
MS 345 The Effect of Particle Size and Spacing on Creep of Two-Phase Copper–Cobalt Alloys. By P. L. Threadgill and B. Wilshire	117
MS 346 Surface Diffusion of Cobalt. By B. Mills and J. R. Howey	125
MS 347 Grain Structure, Properties, and Performance. By I. L. Dillamore	129
MS 348 The Deformed State and Nucleation of Recrystallization. By R. D. Doherty	132
MS 349 Grain-Boundary Migration and Grain Growth. By G. T. Higgins	143
MS 350 Recrystallization Involving a Second Phase. By U. Köster	151
MS 351 Recrystallization in Hot Working and Creep. By H. P. Stüwe and B. Ortner	161
MS 352 Grain-Size Control in Steels. By T. Gladman and D. Dulieu	167
MS 353 Grain Control in Aluminium. By R. Grimes	176
MS 354 Development of Textures in Recrystallization. By W. B. Hutchinson	185
MS 355 The Isothermal Decomposition of Austenite in Simple Chromium Steels. By K. Campbell and R. W. K. Honeycombe	197
MS 356 High-Temperature Ductility of Ni–20% Cr-Base Alloys. By T. B. Gibbons and B. E. Hopkins	203
MS 357 Nitride-Hardening of an Austenitic Stainless Steel Containing Titanium. By D. C. Unthank, J. H. Driver, and K. H. Jack	209
MS 358 The Precipitation Behaviour of Co–Ni–Cr-Base Alloys Containing Nb. By D. W. Chung and M. Chaturvedi	215
MS 359 Plastic Properties of Fe <sub>2</sub> B Single Crystals at Temperatures from 20 to 800° C. By H. Taga and H. Yoshida	222
MS 360 Observations on the Stress-Dependence of Steady-State Creep of a Dispersion-Strengthened Alloy. By G. L. R. Durber and T. J. Davies	225
MS 361 Influence of Vanadium on the Heat-Affected-Zone Properties of Mild Steel. By N. E. Hannerz and B. M. Jonsson-Holmquist	228

— Critical Assessment: X-Ray Examination during Fatigue. By Shuji Taira	234
MS 362 High-Temperature Crack-Opening Displacement Measurements in a Ferritic Steel. By R. Pilkington, D. Hutchinson, and C. L. Jones	237
MS 363 The Crystallography of Phase Interfaces in the Unidirectionally Solidified Cu-Cr Eutectic Alloy. By D. R. Clarke and W. M. Stobbs	242
MS 364 The Effect of Long Ageing Treatments on Steady-State Creep in 20% Cr-25% Ni, Nb-Stabilized Stainless Steel. By I. R. McLauchlin	247
MS 365 Morphology and Crystallography of Widmanstätten Proeutectoid Ferrite. By A. D. King and T. Bell	253
MS 366 Prestrain Cavitation and Creep Ductility. By B. F. Dyson and M. J. Rodgers	261
MS 367 Effect of Explosive Loading on Young's Modulus and Internal Friction of Copper. By G. Rai	267
— Addendum to Paper No. MS 344 by A. P. Titchener and J. A. Spittle	270
— Critical Assessment: The Development of High-Strength Iron Alloys through Gaseous Reactions. By K. H. Jack	271
— Discussion: Capillarity Effect at an $\alpha/\beta$ -Brass Interface. By E. P. Simonen and R. Trivedi	274
MS 368 The Effect of Hot-Band Structure on Texture Development in Low-Carbon Steel Sheet. By S. D. Bhole, W. T. Roberts, and D. V. Wilson	277
MS 369 Thermal Analysis of the Ag-Au-Sn Ternary System in the Region from 20 to 100% Sn. By D. S. Evans and A. Prince	286
MS 370 Discontinuities in the S/N Curves of Rimming and Stabilized Mild Steels. By K. Tabeshfar and T. R. G. Williams	291
MS 371 The Thermodynamics of Liquid Dilute Iron Alloys. By G. K. Sigworth and J. F. Elliott	298
MS 372 The Diffusional Creep Strain Due to the Growth of Intergranular Voids. By J. E. Harris, M. O. Tucker, and G. W. Greenwood	311
MS 373 Substitutional Relaxations in an Iron-15% Germanium Alloy. By M. C. Borah and G. M. Leak	315
MS 374 The Distribution of Boron in Pure Iron. By A. Brown, J. D. Garnish, and R. W. K. Honeycombe	317
MS 375 Grain-Size Effects during Dynamic Recrystallization of Nickel. By J. P. Sah, G. J. Richardson, and C. M. Sellars	325
MS 376 Primary Creep Processes in Supersaturated 20% Cr-25% Ni Titanium-Stabilized Austenitic Steels. By J. M. Adamson and J. W. Martin	332
MS 377 The Effect of Phosphorus Additions and Cooling Rate on the Precipitation of $M_{23}C_6$ in Austenite. By G. R. Kegg, J. M. Silcock, and D. R. F. West	337
MS 378 Thermodynamic Properties of the System Molybdenum-Silicon. By T. G. Chart	344
MS 379 The Coarsening Behaviour of Pure Iron-Carbon Alloys. By J. Giddings, G. M. Leak, and R. B. Nicholson	349
MS 380 The Peritectic Reaction in the System Pb-Bi. By N. J. W. Barker and A. Hellawell	353
MS 381 Tempering of the Bainite and the Bainite/Martensite Duplex Structure in a Low-Carbon Low-Alloy Steel. By Y. Ohmori, H. Ohtani, and T. Kunitake	357
MS 382 Hydrogen and Dynamic Strain-Ageing in Ferrite. By K. B. Gove and J. A. Charles	367
MS 383 Interfacial Energies and the Graphite Crystallization in Cast Iron. By G. T. van Rooyen and G. Paul	370
MS 384 The Influence of Carbon on the Layer Formation during Interdiffusion of Mo and Fe. By C. P. Heijwegen and G. D. Rieck	383
MS 385 Fractographic Investigation of Grain-Boundary Precipitates in Al-Cu Alloys (1 and 4 wt.-% Cu) by Gallium Embrittlement. By R. H. Bukalil, C. Roques-Carmes, R. Tixier, M. Aucouturier, and P. Lacombe	387
— Critical Assessment: Recent Developments in Powder Metallurgy. By G. H. Gessinger	393
MS 386 The Structural State of Austenite during Continuous Hot Strip Mill Rolling. By A. Jones and B. Walker	397
MS 387 Interdiffusion of Cr, Mo, and W in Iron. By P. J. Alberry and C. W. Haworth	407
MS 388 Neutron-Diffraction Studies of the Recrystallization Textures in Cold-Rolled Low-Carbon Steel. By H. J. Bunge, D. Schleusener, and D. Schläfer	413
MS 389 Effect of Deformation on Precipitation-Strengthening. By A. A. Tavassoli	424
MS 390 High-Temperature Deformation of Austenitic Stainless Steels Containing Titanium. By L. K. Singhal and G. L. Mishra	427
— Discussion: Relations between Yield Stress and Precipitate Size. By M.-W. Lui and I. Le May	435
